RAPTOR 9 MAX

wilson

Raptor 9 Max speakers are a three-way design of considerable size, characteristics, and power are intended for use in larger rooms, where they will show their full acoustic potential.

Modern and powerful design, responding to the expectations of those users who appreciate the increased performance but are not indifferent to the aesthetics and classic timelessness of design.

BASS-REFLEX

Bass-Reflex located at the front allows the speaker to be much more effective in the low-frequency range and allowing to place them much closer to the wall.

BI-WIRING AND BI-AMPING OPTIONS

Gold-plated bi-wiring/bi-amping terminals allow independent connection of the woofer and mid-high frequencies.

GRILLES

Black grilles covered with a specialized material acoustically almost neutral, are mounted on mounting studs.

Cabinet: White with wood grain texture
Grille: black

RAPTOR 9 MAX

wilson

LARGEST AND MOST POWERFUL IN RAPTOR SERIES

The Wilson Raptor 9 Max is the largest and most powerful of the Raptor Series. It is identical in height to the Raptor 9, but 2.5 cm wider and 2 cm deeper.

Available in two finish colors, black and white, the speakers will make it easy for users to match them to their listening room or living room environment.

The reinforced structure of Raptor 9 Max enclosures constructed from thick 18 mm MDF boards, covered with a durable and aesthetic layer of modern vinyl with a structure deceptively similar to the surface of wood finished with a slight gloss on the entire surface of the sidewalls, top, and rear.

Sturdy cabinet construction and internal reinforcements are much less susceptible to vibration, and the already mentioned Bass-Reflex port outlet on the front wall allows for greater dynamics and bass depth.

The front of the column is closed with a panel made of modern plastic in white and black colors respectively with a slight gloss. The plastic is resistant to color changes and undesirable effects of light and time.

The whole can be seated stably on large aluminum cone-shaped spikes, supplemented with protective spike pads to protect the floor.

The enclosure houses two 8" (20.3 cm) woofers (20.3 cm) each, a 6.5" (16.5 cm) midrange driver, and a 1" (2.5 cm) tweeter with a textile dome. The drivers use tightly compressed cellulose membranes of the highest quality and high rigidity, as in the rest of the Raptor Series. The crossover ensures the consistency of sound of all elements in this construction.

GREAT OPTION FOR SERIOUS MUSIC LOVER

Raptor 9 Max loudspeakers, because of the size of the cabinet, the possibilities of a large set of drivers offer a solution that will be reached by music lovers with a little more space available in the listening room. They give more possibilities of adjustment to the Hi-Fi system and its power.

SPECIFICATION

Recommended amplifier:	50 to 220W
Frequency response (± 3 dB)	35 - 20.000 Hz
Sensitivity (2.83V / 1m)	92 dB
Impedance	4-8 ohms
Tweeter	1" (25 mm) with soft dome
Midrange drivers	1x 6 1/2" cellulose membrane
Low range drivers	2x 8" cellulose membrane
Enclosure type	Bass-Reflex
Speaker terminals	Bi-wiring, screw-on, gold-plated,
Accessories included	spikes
Dimensions (H x W x D)	1160 x 235 x 323 mm
Weight	24.2 kg
Finish colors	Black EAN: 5902602874056 White EAN: 5902602874063
